

Yik Yu Ng

Nationality: Canadian **Date of birth:** 10 Jun 2003 **Email address:** yik.ng@mail.mcgill.ca

EDUCATION AND TRAINING

Bachelor of Science (Honour in Computer Science) (In Progress)

McGill University [30 Aug 2023 – Current]

City: Montreal | **Country:** Canada | **Website:** <https://www.mcgill.ca> | **Field(s) of study:** Computer science ; Information and Communication Technologies

CGPA: 3.96/4.00

PUBLICATIONS

[2025]

MADS: Ensemble LLM-based Multi-Agent Debate System for Political Bias Detection (Under Review) Y. Ng, BCM Fung, E Obukhova, D. Mouheb, C. Huang and S. Huang

Journal Name: THE ACM WEB CONFERENCE 2026

[2024]

GlucoSense: Non-Invasive Blood Glucose Sensing on Mobile Devices N. Sharma, M. Bebawy, **Y. Ng**, M. Hefeeda

Journal Name: MobiCom 2025

HONOURS AND AWARDS

[13 Jul 2023] YP Heung Foundation

YP Heung Foundation Post-Secondary Award of \$5000 CAD One of the top six students from the faculty of science at Langara College

[6 May 2024] NSERC

NSERC Undergraduate Student Research Awards Award of \$(6000 + 4000 + 1500) CAD for conducting research at Simon Fraser University

[5 Feb 2025] DMaS Lab McGill

Research Funding \$16000 CAD research grant for conducting research at DMaS lab at McGill University

REFEREES

Gladys Wong, Dr. sc. Techn. ETH Zürich

Instructor of course Algorithm and Data Structure II

Department of Computer Science, Langara College

Elena Obukhova, PhD

My supervisor for my independent bias detection project

Associate Professor of Strategy and Organization

Desautels Faculty of Management, McGill University

Link: <https://www.mcgill.ca/desautels/elena-obukhova>

Yvonne Leung, CFA

Head of Managed Solutions Asia at J.P. Morgan Private Bank

RESEARCH EXPERIENCE

[1 Jul 2025 – Current]

Research Assistant @ UBC

Two projects involved during this internship

1. Proposing general resource allocation framework algorithm
 - a. Design a probabilistic recommendation model serve as a prior to the algorithm
 - b. Optimize global well-fare function while preserving user preferences under fairness constraint
2. Graph machine learning method in psychotic patient prediction with explainability
 - a. Speech graph construction from text conversation
 - b. Design state-of-the-art model in classification
 - c. Explain graph prediction using PCA, subgraph algorithms

Supervised by Laks Lakshmanan and Xiaokui Xiao

[1 Jan 2025 – 7 Oct 2025]

Student Researcher @ McGill

Detecting political leaning of news article using multi-agent LLM debate system

1. LLM agent with ensemble
2. Routing the debate with paragraph embedding model
3. Outperform baseline supervised learning method and other larger LLM
4. Provide a dataset for political articles classification

Supervised by Professor Benjamin C. M. Fung and Elena Obukhova

[6 May 2024 – 31 Dec 2024]

Research Assistant @ SFU (NSERC USRA)

Glucose concentration prediction using mobile device

1. Designing protocol for collecting NIR signal underneath human skin
2. Hyper-spectral reconstruction using deep learning
3. Explain model prediction and analyze what are optimal wavelengths for our protocol

Supervised by Mohamed Hefeeda

PROJECTS

[1 Nov 2024 – 15 Dec 2024]

Medial Axis Transform (Course Final Project) Final course project of COMP 558 (Computer Vision) at McGill University1. Replication of the paper Shape-Based Measures Improve Scene Categorization2. Proposing a new geometry property, Convexity, apart from the four cues in the paper based on Gestalt rules3. Investigation on whether these geometry cues are boosting CNN models by experiments and analysis
